

Visual Decoding Operators

ProjectToCurve: $\mathcal{N}(\theta + \beta, \alpha \cdot \theta)$

ProjectToAxis: $\mathcal{N}(\theta + \beta, \alpha \cdot \theta)$

BisectArea: $\mathcal{N}(\theta + \beta, \alpha \cdot \theta)$

HighestPoint: $\theta - \text{Weibull}(\lambda, k)$

MaxSlope: $\theta - \text{Weibull}(\lambda, k)$

Composed Task Predictions (Sec 4)

CDF Median: **ProjectToCurve** $\rightarrow$ **ProjectToAxis**

PDF Median: SensorFusion(**BisectArea**, **HighestPoint**)

PDF Mode: **HighestPoint**

CDF Mode: **MaxSlope**

Cross-task Generalization (Sec 5)

same ProjectToAxis operator, without refitting.
New chart type, size, aspect ratio and task.

Scatterplot Mean Estimate

ProjectToAxis $\rightarrow$ Average $\rightarrow$ **ProjectToAxis**
